

Heizkopf unbedingt am Verdrehen

Natural gas heater

Variable gas heater

Natural gas heaters EFI-HM, EFI-EM and EFI-PM serves not only like the effective and agreeable heat source for the outside use, but also because of its variable it can help like the gas lamp, gas flare or sun shade. The variable heaters are secure against theft.

Prolong the outside season for pubs, restaurants and gardens

The EFI heaters are able to heat up a 5 m radius, giving you nearly 20 m² of pleasantly heated up area.

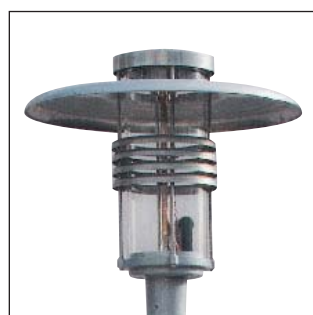

The gas heaters are connectable to a continuous gas supply, this eliminating the need of continually having to store and change gas bottles.

Easy assembly and disassembly

You can carry out do the installation without the help of a plumber. The gas socket has to be fitted by a qualified plumber.

Variability

Within a few minutes you can change it from a heater, to a gas lamp, to a gas flare or to a sun shade.

gas lamp

gas flare

sun shade

Variants:

- HM 100 – hanging
- EM 100 – fit for solid placing to armature shaft
- PM 100 – movable with flower container

Technical Data:

Height:	232 cm
Diameter of lamp chimney:	90 cm
Gas type:	natural gas
Heat output capacity:	ca. 10 kW
Connected load:	ca. 1,16 m ³ /h
Installation box diameters:	36 x 36 cm
- well depth:	67 cm
Diameter of flower container:	80 cm

Note: All the above can be bought as accessories.
